

STONY PLAIN SUN.

VOLUME TEN.

STONY PLAIN, ALBERTA THURSDAY, JULY 17, 1930.

Whole Number 519

Liberal Achievements

+++ +++ +++

1. Return of Natural Resources.
2. Consolidation of C.N.R.
3. Reduction of taxation by \$100,000,000.
4. Reduction of National Debt by \$270,000,000.
5. Restoration of Crow's Nest Rates.
6. Old Age Pension Act.
7. Dunning, Robb and Fielding Budgets.

Under Liberal Administration

1. Manufacturing increased from \$2,400,000,000 to \$4,300,000,000.
2. Building construction increased from \$240,000,000 to \$472,000,000.
3. Hydro power increased from 2,700,000 to 5,600,000.
4. Life Insurance increased from \$2,900,000,000 to \$5,600,000,000.
5. Mineral Production increased from \$300,000,000 to \$1,700,000,000.

Does Not Such a Record Deserve Your Support ?

HON. CHAS. STEWART

WILL ADDRESS MEETINGS AT

SPRUCE GROVE,

THURS., JULY 17, 8 P.M.

GOLDEN SPIKE,

THURS., JULY 17, 9 P.M.

Col. Jamieson's Meeting.

Mr Geo Oppertshanser was chairman at the Conservative Rally in Moose Hall, Friday afternoon. The hall was well filled with attentive listeners when Hon H H Stevens, former Minister of Customs, started his address.

Col. Jamieson was the next speaker. He dwelt at length with the unemployment question; mentioned absurdity of the claims made for the new Dinning budget; touched on several other important matters in connection with Federal policies and wound up by making an earnest plea for his hearers to support by their influence and votes his candidacy.

On account of the excessive heat the meeting was a short one.

Applied Christianity.

Mrs Ida Willie, who is undergoing treatment at a Sanatorium near Calgary, wishes the Editor to convey her sincere thanks to many friends in Stony Plain district who have shown that "a friend in need is a friend indeed." She writes:

"I can't thank my neighbours enough for all they did for me. They looked after my sale when I was in the hospital and they wanted to harvest my crop too. They worked and seeded my farm for me, about 130 acres free of charge. I was going to write each and everyone to thank them, but I do not know just who all helped. Please mention in particular Mr Albert Willie.

[This is the kind of applied Christianity we like to see. All honor to those who took part. — EDITOR.]

Taking a Chance.

On Thursday evening last a freight train drawn by engine No. 4307 pulled into the local siding about 22.20, to allow west bound No. 5 passenger train go by. The freight train was too long for the siding, and blocked the Meridian road, as well as Main street crossing. At the Meridian road crossing a train hand with a lighted lantern was stationed on the north side of the track as a precautionary measure.

This was not done at Main street, with the result that an accident was narrowly averted when an autoist who wished to catch the passenger train came hurrying down and just stopped his auto in time to prevent it crashing into the train standing in the dark.

The writer has seen Main street crossing blocked at night with a stalled train several times lately, with the train crew making no apparent effort to protect the public.

It should not be necessary to have a fatality here before some action is taken to protect the traveling public.

How's Your Bank Account?

It is a common thing for parents to open a bank account for a very young child, taking care of the account until the child is old enough to manage it. Then the bank book is turned over, and Dick or Ruth shoulders a new responsibility.

In this way the child is, early in life, taught the valuable habit of thrift. Practical lessons in the keeping of accounts and records are learned. And as these small savings are conserved and mount upwards, a substantial sum of money is created which will make adequate provision for the later education of the child, or constitute a reserve of capital to start a boy in business or enable a girl to assist in establishing her own home.

Famous leaders in commerce have said that regular saving, even on a small scale, is the surest foundation for financial success. To save only five dollars a week is to build up a financial reserve, which will grow. To contract five dollars debt weekly is to accumulate a growing burden.

Nature starts each of us in life with an account at the Bank of Health, which is handed in trust by older folk, until we reach the age of responsibility for the care of the body. It makes all the difference in the world whether we handle our health account wisely or foolishly.

How is your account at the Bank of Health? Have you a good balance? Is it shrinking instead of growing? You ought to know.

Nature abhors and punishes waste while she approves and rewards thrift, both in what we call the big realm of Nature and in the individual human life.

Experts tell us that reckless and unchecked cutting and fishing threaten the existence of some of the world's largest forests and fisheries. The supplies we thought unlimited may fail. We are learning that continuance of supply depends on conservation, which is simply a bigger word for thrift.

The same is true of health. Nature exacts heavy penalties for waste. Preventive work promotes and assists the practice of health thrift.

Just as a savings account is built up by small deposits, so, too, must our health reserve be built up. Enough food and exercise, enough rest and relaxation, must be deposited in the Bank of Health every twenty-four hours.

These deposits must be in good currency, too. Nature, like our bankers, accepts no bad bills or counterfeit coins.

Why not look into this matter of your account at the Bank of Health? A wise way to begin is to go to your doctor for a complete medical examination. Don't wait until you are sick to visit your doctor; go to him when you are well and have him check you up. Take stock.

Another good plan is to repeat the process of a thorough medical examination at least once a year—say, on your birthday anniversary. In this way any disease which may, quite unknown to you, be making insidious headway, will be discovered in its early stages, checked and cured, and which if left to develop undisturbed until you begin to "feel sick" may then have reached the stage where it is beyond cure.

World's First Talkie Sign

Novelty Introduced At Chicago By Envelope Company

What is probably the first talking sign in the world made its debut before a crowd of over 3,000 Rotarians with a speech, boasting Chicago, telling about its schools, churches, parks, playgrounds (libraries, universities, boulevards, policemen and other civic assets).

George D. Gave of the Gave-O-Fars Envelope Company, is responsible for the sign, which is a 50-by-20 foot affair on the envelope company's plant in North Sacramento boulevard.

The speech was made before the microphone and amplified through the loud speaker hidden in the moon lettering but in the future records lauding the city and boosting for its "Century of Progress" will furnish voice to the sign throughout the day, according to Mr. Gave.

Japan Building 'Planes'

Army airplanes built entirely in Japan are proving highly satisfactory, according to an official report issued by the aviation department of the ministry of war. Recently two scout planes made night-flying tests in which they met every requirement of safety, speed and general airworthiness. Airplanes are now being manufactured extensively by the Kawasaki and Mitsubishi dockyards.

Lead Mines of Spain and Britain were worked more than a thousand years before Christ.

Four Doses Relieved Bad Attack of Cholera

Mr. W. J. Cooper, Maughan, Alta., writes:—"A year ago last spring I arrived in Canada with my family, and one of my boys, aged six, was suffering very much with cholera. When we arrived I had a few hours to wait, and told one of the attendants at the station about it, and he asked me if I had ever tried Dr. Fowler's Extract of Wild Strawberry. I had never heard of it in England, so he told me I could get it in Winnipeg. I am pleased to say I had only to give the child four doses and he got well and was quite cheerful by the next morning."

Airplane Flight To Far North

Government 'Planes To Open Up Air Route In Sub-Arctic Areas

To inspect aeroplane supply caches in the Canadian sub-Arctic and with a view to opening up aerial communication routes in the Barren Lands belt, in the Northwest Territories, a special detachment of the two government aeroplanes will leave Rockcliffe Aerodrome in the near future for an air tour which may extend over 25,000 miles, most of it over a little travelled country.

Fight Lieut. P. J. Macdonald, of the civil aviation branch of the Department of National Defence, will be in charge and will pilot one of the two planes. Flight Sergt. H. J. Winny will pilot the other. In addition to the two pilots there will be two mechanics, Corporal S. C. Dearway, who will be the camera operator, and C. S. McDonald, inland surveyor of the topographical surveys.

The flight will be the first official government step toward the opening up of air lanes in the North West Territories. The majority of the trip will be in the vicinity of the Mackenzie River Basin, the Great Slave Lake area and northward to Coronation Gulf. The flight will also travel over that part of Canada lying to the west of Hudson Bay north of Churchill. With only a few exceptions all the coast to be inspected will be just to the south of the Arctic circle.

The detachment will return to Ottawa before the freeze-up.

SUMMER HEAT

HARD ON BABY

No season of the year is so dangerous to the life of little ones as is the summer. The excessive heat throws the little stomach out of order so quickly that unless prompt aid is at hand, the baby may be beyond all human help before the mother realises he is ill. Summer is the season when diarrhoea, cholera infantum, dysentery and colic are most prevalent.

Any of these troubles may prove deadly if not promptly treated. During the summer the mothers' best friend is Baby's Own Tablets. They regulate the bowels, sweeten the stomach and keep baby healthy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Edmonton Exhibitions

Prize List Contains Regulations Regarding Surgical Treatment Of Show Animals

The Edmonton Exhibition prize list contains a regulation in the cattle section, that any animal exhibited, which has been so treated as to alter its natural conformation, will be disqualified. Competitors, veterinarians will examine the cattle to ensure the enforcement of this regulation. This is in line with the present wide agitation to eliminate the cutting of ties and the surgical or other treatment of show animals for show ring purposes.

After Ten Years Of Asthma Dr. D. Kellogg's Asthma Remedy proved the only relief for one grateful user, and this is but one case among many. Little wonder that it has now become the one recognized remedy on the market. It has earned its fame by its never failing effectiveness. It is earning it today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

A Huge Birthday Cake

One of the largest birthday cakes ever cut in London was consumed recently when the British and Foreign Bible Society celebrated its 128th birthday. The cake weighed 126 pounds—a pound for every year—and carried 126 candles. The cake was made in the design of a Chinese building.

Douglas' Egyptian Liniment, always quick, always certain. Stops bleeding instantly, cleanses the wounds and prevents blood poisoning. Splendid for muscular rheumatism.

Voluntary Bird Census Takers

Many hundreds of persons in Canada and the United States are voluntarily assisting in the taking of a waterfowl census to determine any increase or decrease in the numbers of waterfowl that inhabit North America. This is not strictly a census, but very valuable data are being secured.

Minard's Liniment checks Colds at once.

Serious Rectal Troubles Often Caused By Harsh Cathartics

ENOS "FRUIT SALT"

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

French Evacuation Of The Rhine

Reports State That Departure Of Troops Was Somewhat Hurdled

All was not so quiet and peaceful as official reports stated when the last French troops left Mainz and Wiesbaden recently, according to the Paris National organ, "La Liberté," which describes the departure under the headline of "violent incidents." La Liberté says that, owing to hostile manifestations, booing and whistling by the crowd at the Mainz station, Gen. Guillaumat, commander-in-chief of the Rhine army, had to leave the blinds of the compartment occupied by himself and his staff. The newspaper also quotes a German newspaper story to the effect that the French troops covered the distance from their barracks to the railroad station in two minutes, whereas ten minutes was usually taken for the same march.

The Lokal Anzeiger calls it "pre-empted departure."

Gen. Guillaumat himself, who arrived in Paris with the president of the inter-allied high commission, M. Tirard, declared the departure of the French troops was effected normally without any noticeable incident.

M. Tirard said: "We have given evidence of our confidence in the good faith of Germany. May it be understood and appreciated by the government and population of the Reich."

Minard's Liniment for all Strains.

After thirty-five time seems to pass so rapidly that by the time you have forgiven somebody for his Christmas present it's time to do it all over again.

Montreal An Important Port

Claims To Hold the Lead As a Grain Exporting Port

Despite the retarded grain movement in Canada in 1929, Montreal continued to hold the lead as a grain exporting port in North America, the comparison with other main ports on the continent being given in the Montreal Harbor Commissioners' annual report as follows:

Montreal	90,994,208 bus.
New York	68,995,992 "
Galveston	35,746,057 "
New Orleans	18,279,799 "
Baltimore	17,600,449 "
Philadelphia	9,415,595 "
Boston	4,104,479 "
Portland, Me.	2,427,655 "
Newport News	1,623,785 "
Mobile	1,115,659 "

Ferrian Balm is magical in treating alluring complexion. A little gentle rubbing and your skin is invigorated and touched with the true beauty of youth. Charming fragrance. Delightful to use. Cools and cures the skin. Relieves all roughness and chafing caused by weather conditions. Tones and stimulates. Enhances and protects the loveliest complexion. Unrivalled as a perfect aid to beauty and charm.

Time Not Worth Much

Do you know how many feathers are on a hen's back? The winner of a recent contest to determine just that has found there are on an average of 8,120. The winner dissected a hen's skin and painstakingly numbered each feather, arriving at the above total.

Talkies in German were recently shown in Helsinki, Finland, with some success.

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

The Pending Completion Of Hudson Bay Railway Will Stimulate Mining Interest

With the Hudson Bay Railway in its final season of construction, and with improved passenger and freight service, exploration of mineral properties to which the Bay line is tributary, has started on a really important scale for the first time. Several companies and syndicates have launched programmes to develop groups of claims in the neighborhood of the new steel trail.

A dull mineral season is in view for the region north of Churchill, but reports circulating in mining circles point to interesting activity along the Hudson Bay Railway.

Within the past few weeks, half a dozen parties have travelled north on the line to explore promising areas quietly, before there are signs of a rush to one of the many new discoveries northeast of The Pas.

However, it is unlikely that prospectors will be allowed to travel north of Mile 413 this year, unless special arrangements are made with the federal government. More than one well-known mining man from northern Ontario has reached The Pas this summer with the hope of travelling to Churchill. But they have been disappointed. In one instance, a man raised an argument here over the fact that an eastern station agent had checked his equipment right through to Churchill, and he had hurried to The Pas, only to find that he could not get to the port. Railway officials explained present regulations to the prospector, and he has to be content to postpone his trip until another season. It is reported in The Pas that efforts will also be made this year to trace down Indian reports that deposits of native silver lie in that great triangle southeast of the Hudson's Bay Railway, and bounded by God's River on the east, and Oxford Lake on the south.

Last year a few samples of beautiful silver ore were found their way into The Pas from York Factory. It was stated then that a York Factory man and some Indian companions had found the native metal somewhere in the mystic triangle. Excellent detective work on the part of mining engineers failed to show up the origin of the native silver, and the find—if there has been one—remains undrugged.

For years, Indian lore has hinted of spectacular silver to be found in that 62,500 square miles of territory. This season may see a climax to the silent drama of centuries, and who knows but what a second Cobalt may spring up in that little explored region south of York Factory on Hudson Bay.

New Type Mail Box

Sweden Installing One Which Gives Detailed Information

A new type of mail box with a detailed information chart is now being installed in Stockholm under the supervision of Sweden's postmaster-general, Anders Orne. The chart not only tells when the box is emptied, but also gives the location of the nearest post office or automatic stamp vending machine, as well as postal rates and the departure of mail trains for various parts of Sweden and abroad.

Wife (as they return from party): "Do you realize what you did?" Hubby: "No, but I'll admit that it was wrong. What was it?"

New Application Of Marconi's Invention

"Is that Signor Marconi? Could you light my lamp? The electricity company has cut off the current." — Guerin Meschino, Milan.

W. N. U., 1846

Setting Pace In Egg-Laying Contest

Rhode Island Red Has Lead Of Seven Points

Records of the Canadian egg-laying contest at the Dominion Experimental Farm, Ottawa, this year, show egg production to be 2.7 per cent. above last year and 3.6 per cent. higher than in 1928 for the corresponding period. Birds entered appear to be swinging into great production with the approach of summer, 33 pens having reached or passed the fifty-egg mark during the thirty-second week of the contest. It is interesting to note that of these 33 pens, 21 are White Leghorns.

While a pen of Barred Plymouth Rocks holds the leading position in the contest to date the leading individual layer so far is a Rhode Island Red. Two Barred Rock pens and this leading Rhode Island have laid the same number of eggs—14—but a slight advantage in weight on the part of the heavier Rhode Island Red gives her a lead of seven points over her nearest rival.

There is, however, indication that this year's egg-laying contest will show the same gratifying increase in egg production which has been in evidence each year since the contests were instituted in 1919. Some very fine records are likely to be hung up at the close of the contest.

Will Work On "E. P. Ranch"

Two Lancashire Girls Take Jobs Offered By Professor Carlyle

Two Lancashire girls arrived in Canada recently on the Canadian Pacific liner "Duchess of York" en route to Pekisko, Alberta, where they will start their careers on the "E.P. Ranch."

The two girls, Doris and Muriel Howe, sisters, said, "We do not know what we are going to do out there; it may be clerical or it may be housework. But that doesn't matter. Professor Carlyle, manager of the Prince of Wales' ranch, engaged us and we are looking forward as much to the new job as we are to seeing our brother who is coming from Saskatoon to meet us."

Doris worked in the office of a grocery business in Blackpool and her younger sister, Muriel, was in the public library at Blackpool.

Fruit Crop Prospects

Prospects For 1930 Crop Are Considered To Be Good

The fruit crop prospects for 1930, as on June 1st, are encouraging and, generally speaking, indicate the possibility of a total crop approximating that of 1929, according to the Department of Agriculture's crop report No. 2. Cherries, plums, peaches, pears and grapes, all indicate considerable increase over last year ranging from 9 per cent. in the case of cherries to 34 per cent. for plums. Apples promise well and while the total crop is expected to be less than last year, indications point to a yield equal to or slightly heavier than the average commercial crop for the five-year period 1925-29, estimated at 5,178, 124 barrels.

B.C. Canned Salmon

Importance of Coast Industry Is Shown By Figures

Shipments of British Columbia canned salmon from Vancouver to points outside of Canada in 1929 amounted in all to 1,313,097 cases of 48 pounds each, indicating the importance of the Pacific Coast canned salmon industry as a factor in the external trade of Canada. Australian countries continued to be first among the purchasers, with France second and the British Isles third. Thirty different countries were customers of the British Columbia canned salmon exporters last year.

Manitoba Telephone Building

The Manitoba Telephone system will commence construction on a 15-storey exchange this year which will cost in the neighborhood of \$1,000,000. Tyndall stone will be used.

New Provincial Park For British Columbia

Is One Of World's Finest Stands Of Timber

Cameron Lake Forest, on Vancouver Island, one of the world's finest stands of timber, will be made a provincial park under the plans announced by Premier Tomin. As a first step in this project, probably the most important ever undertaken in Canada to preserve a virgin forest, the government has ordered an immediate cruise of the entire Cameron Lake area. This will be undertaken by the provincial forestry service and a report will be filed with the government before fall.

The Cameron Lake Forest, known to travellers from every part of the world, lies between the lake and hills which are crowned by snow-capped Mount Arrowsmith. It consists of giant fir, cedar and balsam, growing close together and reaching to such heights that the island highway, winding between them, is in twilight on a sunny day.

Canadian Tobacco Industry

Considerable Quantity Of Canadian Product To Be Shipped To England

"If the necessity arises, the government will not hesitate to appoint a special commissioner in England to look after the interests of the Canadian tobacco growers," stated Hon. James Macdonald, Minister of Trade and Commerce here, in commenting on the tobacco domestic situation.

"The Canadian Government is in close touch with the tobacco growing industry," said Hon. Mr. Macdonald, "and through its trade agents in Great Britain, has already put the British manufacturer in close touch with Canadian growers. It is expected a considerable quantity of Canadian tobacco will be shipped to Great Britain this year," he said.

The British Empire

The British Empire occupies about one-quarter of the habitable surface of the earth and its population exceeds one-quarter of the estimated number of the human race.

CENTER FOR ALPINE CLIMBING

Into a country where there are many important peaks still unexplored and even unnamed, will come Alpinists from all over the world for the 1930 annual camp of the Alpine Club of Canada, July 28th to August 10th, in Jasper National Park. Alpine members of the medical profession of England, will be among those at this year's camp.

In this vast mountain kingdom, climbers will try their skill in the Maligne Lake region, where such peaks as Mt. Sampson, Mt. Charlton, Mt. Uawit, Mt. Warren, Mt. Mary Vaux, Mt. Maligne, and Mt. Brasseau—ranging from ten to eleven thousand feet in height, offer most interesting climbing problems.

It is perhaps the splendid ruggedness, the massing of effects that distinguishes this region from all others. In the Rockies the folly of comparison, where beauty is concerned, is always obvious. There are a score of lakes, each different, which, once seen, hold their place in the heart forever. Yet this stands out among them all. Where many of the others are chamber music, Maligne is the great orchestra. The composition forms one picture

High Milling Quality Of Canadian Wheat Flour Is Proven Under Rigid Tests

Women's Institutes

1,150 Women's Institutes In The Rural Districts Of Ontario

There are now 1,150 Women's Institutes in the rural districts of the Province of Ontario with a membership of over 40,000. These Institutes exist for promoting social contacts and whatever is beneficial to the community as a whole, especially to women and children, through co-operative effort.

The movement, started at Stoney Creek, Ontario, in 1897, has now become world wide. Women's Institutes, wherever they exist, are non-sectarian and non-party political. Recently an international conference of representatives of Women's Institutes was held at Vienna, Austria, at which delegates from most of the important countries were present.

Destructive Wheat Disease

Loss Caused By Foot - Not Greater Than Any Other

Of all the fungous diseases affecting wheat "Take-Ail," or foot-rot, is the most destructive, observed the Dominion Botanist of the Department of Agriculture, at Ottawa. The actual loss caused by it is far greater than by any other single disease, rust included, or perhaps a combination of all known fungous diseases affecting wheat. A peculiar thing about this disease is that it appears only once in a series of years. Fortunately for Canada, the exercise of proper care and the wholehearted support of Western farmers have kept the disease from becoming seriously established in Canada.

An alert Italian delicatessen dealer built his shop over an old mine shaft, so that the upcoming stream of cold air serves to keep his perishable commodities cool.

The high milling quality of Canadian wheat flour has recently been further proved by the Research Department of the Board of Grain Commissioners for Canada, as a result of a series of exacting tests. These tests show that blending of from 30 to 50 per cent. respectively of Canadian flours with weaker flours grown in other countries give bread varying from 14 to 43 per cent. more caloric content than the country's domestic flour will produce. The largest loaf made during the tests was made from all Canadian flour. Samples of Russian, French, Australian, German, Danish, Argentine and other wheats were used in the tests. Flour was milled from the samples obtained and loaves made from the flour and the results carefully noted. The addition of 20 per cent. Canadian flour with the unbleached flour from the wheat of each country was then added and the size of the loaf was increased from 14 per cent. in the Russian to 25 per cent. in the Argentine. An increase to 35 per cent. of Canadian wheat made an additional improvement in the size of the loaf.

Produces Better Eggs

Poultry Experts Find Large Hen Exceeds In Production

The larger the hen the better the eggs she lays and the more there are of them. Poultry experts of the Dominion Department of Agriculture find that body weight has a very direct relation to egg production. A three pound hen will average 137.9 eggs a year, weighing 23 ounces to the dozen. With each 1/4 pound increase in weight there is an increase in the number of eggs laid and their weight per dozen—a four and a half pound hen will lay an average of 206.6 eggs a year weighing 24.5 ounces to the dozen. This item should be of particular interest to farmers keeping poultry flocks.

Ornamental Shrubs

Development Of Hardy Types Of Shrubs and Perennials

Not the least important of the work being done by the Experimental Farm and Station of the Dominion Department of Agriculture is the development of types of ornamental trees and shrubs and hardy perennials, annuals, and garden flowers suitable for use in all parts of Canada. Many of these have been found suited to even the most difficult climatic conditions, and the report of the Experimental Farm or Station nearest you will provide an indication of varieties adapted to use in your locality.

Power Resources Of Manitoba

Claimed That 73 Per Cent. Of Water Power Resources Of Prairie Area Located In Manitoba

The considerable power resources of the Province of Manitoba are estimated at 5,000,000 h.p., of which 308,000 h.p. already are in operation. It is claimed that 72 per cent. of all the water power resources in the Prairie Provinces are situated in Manitoba. The Winnipeg River power sites are estimated to be sufficient to provide for a population of 2,500,000 in Winnipeg and to provide employment for 300,000 industrial workers. This power, drawn out products worth in the neighborhood of a billion dollars every year.

Airplanes are being used in battles against insect pests in Peru.

"I warn you that you'll have to pay 5s. fine for bathing here." "Certainly, just take 5s. out of my jacket pocket, because I'm committing suicide." — Gutierrez, Madrid.

WORLD HAPPENINGS
BRIEFLY TOLD

Five thousand members of the American Legion and lady members of the Legion auxiliary are to visit Winnipeg for two days in August.

A British Empire Trade Exhibition, the first of its kind to be held in any country outside the empire, is to be held in Buenos Aires from March 14 to April 27, 1931.

A new India House was opened in London by King George with an expression of hope for the emergence of India from her present troublous era into days of peace and contentment.

Official figures on unemployment, showed 1,815,300 out of work in Britain on June 23. This was about 70,000 less than on June 16, but 697,493 above the same date a year ago.

Sir Joseph Ward, former premier of New Zealand, who resigned a few weeks ago owing to ill health, is dead. Sir Joseph, who was known as "the grand old man" of New Zealand, was 74 years of age.

Ralph Collins, Edmonton, Alberta, has been awarded second prize in an oratorical contest at the convention of the Optimist International, in Erie, Pa. Seven boys from clubs in the United States and Canada, including David Wolf, Washington, D.C., was first.

Marriages at famous Gretna Green, the elopers' haven in Scotland, are to be made extinct by legislation. The Government plans to pass by next fall a measure which will make legal only marriages which have been performed by a clergyman or a registrar.

The Quai D'Orsay has submitted the name of Arsen Henry, who is French minister to Tim, to the Canadian Government for approval as the next French minister to Canada. Hon. Jean Knight, the first holder of this post, is returning to France to become head of the French Government Press Bureau.

UNCOOKED SALAD DRESSING

Warm weather and plenty of vegetables combine to make the tempting salad a frequent dish on the menu. The secret of a delightful salad is the dressing and here is the recipe for an uncooked salad dressing that will be relished by every member of the family — and it can be made up quickly, and, once made, it will keep for weeks:

- 2 eggs.
- 1 teaspoonful salt.
- 1 teaspoonful mustard.
- 1 cup vinegar.
- 1 can Eagle Brand Milk.

Beat vigorously all ingredients except vinegar, for a few minutes. Add vinegar, stir well and set aside for a few hours to thicken.

Plans To Visit the Moon

Scientist Has Perfected Model Of a Rocket That Will Make Trip

At Horst, a little bathing place on the Baltic, Professor Oberth has been very busy of late perfecting an exact model of the rocket in which he intends visiting the moon. This model rocket is to be shot up by the explosion of the gas it contains and instruments concealed in it will record the composition of the atmosphere through which it travels. An automatic parachute will bring the rocket down again when the motors are exhausted. The rocket-model is expected to reach a height of 100 kilometers and to bring back valuable secrets.

Doctor: "You say you have been drinking six glasses of beer a day? I can only allow you half that number."

Patient (after a pause): "I really believe I used to drink a couple more." — Mummel, Hamburg.

3444 ITS SMART AND WEARABLE

A sportive frock of yellow and white printed linen boasts of its plaided skirt treatment.

It has the smartly belted waistline like the grown-ups are wearing, that achieves a pinched-in effect.

A large yellow bow button attracts attention to the tab closing of bodice with interesting cap sleeves.

The back is quite straight and slender.

Style No. 3444 is simplicity itself to make. It can be had in sizes 8, 10, 12 and 14 years. For the miss of 8 years, 1 1/4 yards of 39-inch material with 1/4 yard of 39-inch contrasting is sufficient to copy it exactly.

The two-piece skirt is merely pressed into box-pleat effect and attached to the bodice. Patch pockets stitched at edge of plait, secure a snug hipline, to keep its line slender.

It's so attractive in white cotton broadcloth printed in sailor blue polka-dots with cap sleeves, belt and pockets of plain blue.

Shanting is stunning in opal-pink shade.

Tub silks in baby blue or baby pink tones is just the cutest idea ever that promises to be very popular this summer for beach and country wear.

Nile green and white pique print worn with green leather belt is smart.

Yellow-beige and brown stripe in men's cotton shirting fabric is very effective with the cap sleeves and pockets cut on the bias and worn with brown leather belt.

Printed dimly, printed handkerchief lawn and gingham checks also appropriate.

Price 25 cents in stamps or coin (cash preferred).

English Students For Canada

Hamilton Fyfe, the new head master of Queen's University, Kingston, stated recently that a movement was reaching fruition by which English public school boys will go to Canadian universities in the same manner as Americans and South Africans are Rhodes scholars at Oxford.

Although we may be iconoclast in many things, we stand loyally by our prejudices.

Takes First Glider Lesson

Prince Of Wales Coached By Famous German Pilot

The Prince of Wales has taken his first glider lesson.

The lesson was given near Lewes, Sussex, by Robert Kronfeld, a German, who is reputed to be the world's champion glider pilot. It consisted chiefly of a demonstration as how to operate the glider, and it was understood the prince did not actually pilot the ship.

The prince long has been an enthusiastic aviator and is reputed to be an excellent pilot, although for reasons of state he is never permitted to make solo flights. He always is accompanied on his flights by one of the best Royal Air Force pilots, but the prince handles the controls except when taking off or landing on strange or difficult landing fields.

Montreal Has Grown Rapidly

Is Now Fifth Largest City On the Continent

Few cities in Canada have shown such substantial growth as Montreal. Within a decade the total assessable property has doubled in value and is now \$1,200,000,000. In 1914 the population was 625,000; today there are a million people in the city proper. In 1914 there were 153 miles of streets and today there are 600 miles. The municipal revenue, which in 1914 was \$10,500,000, is now \$36,750,000. Montreal has reached the rank of the fifth largest city on the continent.

Keep Appointment

Four Men Kept Tryst Started 31 Years Ago

Keeping a tryst started 31 years ago, four men met in Trafalgar Square, London, England, on a recent night. In 1899 six young decorative artists, H. E. Mansfield, G. MacDonald, G. Clifton, E. Bitt, Brown and Edwards, were notified that the studio in which they worked was to be razed. They then made a vow to meet, once a year. This year they met. Mansfield, MacDonald, Clifton and Bitt were able to attend, but the two absent ones sent telegraphic greetings to their friends.

Agricultural Conventions

Efforts will be made to bring as many large agricultural conventions as possible to the west at the time of the World's Grain Exhibition and Conference, in Regina, in 1932. According to a decision of a committee session, such conventions will be invited to meet directly prior to or following the show, in cities other than Regina. Delegates will thus be able to attend Regina session.

SUNDAY SCHOOL LESSON

JULY 20

MOSES "A COURAGEOUS LEADER"

Golden Text: "By faith he forsook Egypt, not fearing the wrath of the king; for he endured, as seeing Him who is invisible."—Hebrews 11:27.
Lesson: Exodus 1:8-14; 2:1-22; 3:1-11; 13:9; 32:30-35; Deuteronomy 34:1-8; Hebrews 11:23-29.
Devotional Reading: Psalm 90, 12-17.

Explanations and Comments

The Call Of Moses, verses 1-10. — The summons to become the leader of his people, deliver them from oppression in Egypt and bring them forth on their way to the Promised Land, came to Moses as, in his care of the flock of his father-in-law, Jethro, the priest of Midian, he wandered from the back of the wilderness (that is, the west; the east is always the front), to Horeb, the mountain of God. There before the bush that burned and yet was not consumed, Moses heard God speaking to him. Just as the account of the temptation of Christ in the wilderness must have come from Christ Himself, and is his pictorial way of portraying His inner experience, so the account of the call of Moses in the wilderness must have been told by Moses himself, and may have been given by him in his pictorial way. The burning bush may have been an outward representation of an inward experience—the flame of enthusiasm for a great cause. Be that as it may, it is assuredly true that Moses had played power to see the divine origin of the glowing beauty of the bush; he was able to see God in the things of everyday life.

"Moses stood before an ordinary bush, and he became aware of God; Jeremiah stood before a budding almond tree while all around was dead, and he became aware of God; Wordsworth stood before a little primrose on a rock, and it became to him the court of the Deity."—J. H. Jewett.

"Draw not nigh hither; put off thy shoes (sandals) from off thy feet, for the place whereon thou standest is holy ground." Recall Jacob's sense of God's presence at Bethel and the holiness of the place.

"Earth's crowned with heaven, and God's common bush affire with God; But only he who sees, takes off his shoes."—J. H. Jewett.

The rest sit round it and pluck blackberries." — Mrs. Browning.

With a new flash of insight Moses knew that God was calling him to a stupendous task, that it was God's will that he should return to Egypt and accomplish the deliverance of the enslaved Israelites. All this is expressed in the words of verse 7-9.

Building Permits

Building permits issued by 61 cities in Canada during May of this year were valued at \$10,621,932. For the first five months of 1930 the total value of building permits issued by these cities had a value of \$65,267,996.

Reciprocal Trade

British Bankers In Favor Of Free Trade Within the Empire

Reciprocal trade agreements between the nations comprising the British Empire and the retention of an open market for Empire products was urged in a resolution adopted recently by representatives of several leading British banks meeting in the offices of Hambro's Bank, London, England. The meeting was presided over by Sir Eric Hambro.

"Urgent measures for the promotion of inter-imperial trade are needed to secure and extend the market for British products, both at home and through export trade," the resolution read. "Bitter experience has taught Britain, that hopes expressed four years ago in the plea for removal of restrictions upon European trade have failed. Restrictions have been materially increased and the sale of surplus foreign products in British markets has steadily grown. While we retain hope for the ultimate extension of free trade worldwide, we believe the immediate step for securing and extending the market for British goods lies in reciprocal trade agreements between the nations of the British Empire. As a condition of securing these agreements Britain must retain an open market for all Empire products while being prepared to impose duties on all imports from other countries."

London Traffic Project

Scheme To Construct Underground Lines For Transportation Of Goods

A scheme is on hand to make possible the removal of goods traffic from London streets. It consists of the construction of underground lines, with fifty-four stations, for the sole purpose of carrying goods. The promoters are anxious to build seventy-five miles of tubes at a cost of about \$200,000,000. All the principal railway termini and goods yards would be connected; the docks, wharves, and public stores would have their private stations. It is said that 125,000,000 tons of goods are carried annually in London, and the trade of the Port of London amounts to \$144,000,000 a year. According to the promoters of the new scheme the cost of existing congestion in the streets is \$120,000,000 per annum, while the railways have estimated at \$30,000 a year the amount of money they lose by the detention of goods lorries at Billingsgate Market alone.

Minister—And what parable do you like best, my son?
Willie—The one about the multitude that loafs and fishes.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

VICEROY WOULD DEAL WITH FIRM HAND IN INDIA

Simla, India.—A fight to the finish with the civil disobedience movement was promised by the viceroy of India, Lord Irwin, in his address to the Indian legislature at Simla.

"As long as civil disobedience persists we must fight it with all our strength," Lord Irwin said. "I believe the right and best solution to the riddle of India will be found only in Britain and India joining together in the search."

Lord Irwin bitterly denounced the civil disobedience method of procedure instituted by Mahatma Gandhi, now jailed. He said it was a "deliberate attempt to coerce established authority by mass action."

"It, therefore, on account of its natural and inevitable developments, must be regarded as unconstitutional and dangerous subversive. Mass action, even if the promoters intend it to be non-violent, is nothing but the application of force under another form. And when it avowedly is intended to make government impossible, the government is bound either to resist or abdicate."

The present movement is exactly analogous to a general strike in an industrial country intended to coerce the government by mass pressure instead of argument."

In reference to the Simon commission's report on India and the proposed round table conference in London next autumn, Lord Irwin said:

"The responsibility of expressing a considered opinion has now passed to the government of India—and just as the Simon commission would have failed in its duty to parliament if it had not presented a report reflecting faithfully its own conclusions as members of the British Parliament, so the government of India would fail in its duty if, similarly, it did not approach a consideration of the commission's report with complete liberty of judgment."

Claim Of Rancher Earl Is Confirmed

Earldom Of Egnott Belongs To Alberta Man Says Judge

London, England.—Mr. Justice Eve in Chancery Division of the supreme court confirmed the claim of Frederick Trevelyan Perceval, former Alberta rancher, to the title and estates of the Earldom of Egnott.

His Lordship confirmed the decision made four weeks ago by the Master of the Chancery, P. W. Vandler, who found the claims of Robert Poinall, retired official, and James William Perceval, baker, to be dismissed.

Mr. Justice Eve granted a declaration that the "rancher earl" was entitled to the monies in the hands of the trustees, subject to trusts of settlements, and that the trustees should make a vesting charge in favour of Perceval.

Testing Out Glider

Flight Across Atlantic May Be Attempted Later

New York.—A wireless message from the liner "Saturia" revealed that the glider "Claibourne Foster" stayed in the air for eight hours, believed to be the longest ocean flight ever made in a towed glider.

The glider, named for the Broadway actress who is sponsoring the venture, is being taken to Gibraltar for an attempted east-west flight across the ocean behind a ship. On the eastward voyage practice flights are being made by the youthful owners, Hugh Keavney and Robert Lewis.

Population Of Prince Albert

Prince Albert, Sask.—Local civic officials and members of civic boost organizations are claiming a population of 12,000 for Prince Albert, the voters' lists having shown there are 4,755 voters within the boundaries of the city. This new total is based on the contention that the number of those entitled to cast a vote is generally about one-third of the population.

W. N. U. 1846

Labor Government Escapes Defeat

Have Slim Majority On 'Critical Division In British House

London, England.—MacDonald Labor Government escaped defeat by the slim majority of three votes in a critical division in the House of Commons on the finance bill. It was the smallest majority in this government's career, which was sustained by eight votes two months ago on the coal mines bill and lost a vote on a minor clause of the coal bill before that.

The vote was against an amendment moved by Rt. Hon. David Lloyd George, the Liberal leader, under which profits spent upon modernization or improvements of plants or machinery would be rendered exempt from income tax.

Although it was the Liberal leader who sought the amendment which met adamant opposition from the chancellor of the exchequer, it was some of the Liberals who saved the government and further weakened the oftbroken solidarity of the Liberal party in the House. Four Liberals voted with the Labor government. They were D. Simon, of the Withington division of Manchester; Sir William Edge, Leicester; Sir Robert Hutchison and Percy A. Harris, Bethnal Green. Beside these, several Liberals, including Sir Godfrey Collins and Sir Donald McLean, abstained from voting.

Milling Qualities Excellent

Millers In Britain Are Enthusiastic Over Garnet Wheat

Ottawa, Ont.—Considerable enthusiasm was expressed among millers of Great Britain and on the continent who investigated Garnet wheat as to its milling qualities. A report by L. H. Newman, Dominion cerealist, on the result of the investigations of specially bagged shipment of this blend of wheat overseas has been made public. For a time at least Garnet should be shipped as a separate variety, instead of mixed with Manitoba. This would give the millers an opportunity of knowing the variety they were dealing with and they could treat it to the best advantage.

The Federal Department of Agriculture decided to submit Garnet to test by millers in the United Kingdom, and in different European countries. A year ago 6,700 bushels were shipped overseas to men expert in milling to obtain their opinions as to its suitability. These men were asked a series of questions, and Mr. Newman's report includes the replies they made.

Ban On U.S. Apples

Order Issued By British Government Effective Between July 7 and November 15th

Toronto, Ont.—A. M. Wiseman, British trade commissioner for Canada in Ontario, has received official information from the British government of an order just issued, prohibiting the importation of raw apples from the United States into the United Kingdom, between July 7 and November 15.

Exceptions to the ban are: in barrels, United States fancy and United States No. 1; in boxes, extra fancy and fancy. These must be accompanied by certificates signed by an authorized inspector of the United States department of agriculture.

It is learned that the embargo may be due to a fruit fly known as the "railroad borer," which is not believed to exist in England.

Had Narrow Escape

Markinch Man Left Grain Bin Just Before Wall Gave Way

Markinch, Sask.—J. E. Burke, local agent for the North Star Grain Elevator Company, narrowly escaped being buried alive here when a grain bin in the elevator, next to the one he had been cleaning, burst open, just as he had climbed out, pouring several tons of wheat into the space he had just vacated.

Had the breakage occurred but a few moments sooner, it is probable that Burke would have been hopelessly trapped in the bin, with little, if any, chance of getting out.

IN MOTOR ACCIDENT

Duke of York, who figured in a motor collision on his way to the second cricket test match at Lords. He was uninjured.

Boy Scout Jamboree

First Official Jamboree Ever Held In Canada Staged At Prince Albert National Park

Prince Albert.—First boy scout jamboree ever held in Canada was officially opened in Prince Albert National Park, with 476 scouts answering the roll-call. Situated on beautiful Lake Waskesiu, the site selected for the camp is ideal in every way. "Big Beach," nearly half a mile long, paved with clear, white sand, and curving out to Prospect Point, offers fine bathing facilities, combined with perfect safety.

Waskesiu Beach, the park headquarters and the site of the western summer home owned by Premier Mackenzie King, is a government motor camp, equipped with kitchen shelters, open fireplaces, life-saving equipment, warden's quarters, service and filling stations.

Crooks Displace Decent Men

Given Election Posts In Chicago Despite Records

Chicago, Ill.—Throwing an illuminating light upon Chicago election disorders and the ability of known crooks to get into public life, from minor positions to the state senate and the bench, a supplemental petition has been filed before County Judge Edmund V. Maguire.

The petition names 211 men and women, alleged to have police and criminal records, who have been appointed as election judges and clerks. This petition, signed by a large number of reputable voters, follows one filed last month in which 275 judges and clerks were named as having police or prison records. Men and women judges and clerks with clean records were displaced to make room for the list handed in by the political bosses, it is asserted.

The initial order for silverware for the new Waldorf-Astoria Hotel, in New York, calls for 100,000 pieces.

Would Halt Immigration

President Beatty Of The C.P.R. Would Put Check On Entries From U.S. and Europe

Toronto, Ont.—Immigration from the United States and Europe should be stopped for the time being at least, said E. W. Beatty, K.C., president of the Canadian Pacific Railway, in an interview here. Mr. Beatty would not include on the ban, however, "those British immigrants who bring their own capital and can proceed under their own steam."

"Unemployment is bad in the building trades, I think, because the usual projectors of big buildings are holding back until the wheat situation clears up. But if we have a normal crop this year and it moves out in a normal way, which it should, unless there is a permanent resistance in Europe, which I doubt, the situation in Canada should clear up," said Mr. Beatty.

Proposed Power Line

Plan To Produce Power For Saskatchewan Being Considered

Prince Albert.—A proposal by interests of eastern Canada and the United States for expenditures of \$4,500,000 on construction of a power project at what is known as "The Horseshoe Bend" on the Saskatchewan River, is under consideration of the Saskatchewan government.

The site for the proposed harnessing of the river, which would produce power for distribution throughout the province, is 35 miles east of Prince Albert.

It was said here that the Fraser Brace Engineering Company of Montreal, and Rollins and Sons, Boston, are backing the scheme. It is considered development of northern Saskatchewan's pulpwood resources would follow completion of the project.

For Poultry Congress

Exhibits From Brandon District Now On The Way To Big Show

Brandon.—An exhibit of live poultry from the Brandon district is now on its way to the World's Poultry Congress, being held in London, England, this month.

Thirteen of the 50 birds going from Manitoba were contributed by exhibitors in the district. Mrs. Joa Woods sent three Black Orpingtons; Jas. Clarke, three Black Wyandottes; John Windover, pair of White Chinese geese; the provincial exhibition park, a pair of Canada wild geese; Roger Morrison, a Barred Rock cock; Mrs. John Mumby, a white turkey tom, and Mrs. A. M. MacPherson, a white turkey hen. There are to be about 1,000 birds from all Canada at the show in London.

Expects Heavy Crop

Saskatoon.—Third generation Marquis wheat is standing four feet high on the farm of Henry W. Fisher, at Hague, Sask., north of here, and the heads are about four inches in length. If nothing happens to it, Fisher expects his 50-acre crop to go over 40 bushels to the acre.

TWINS TAKE LONG TRIP

June and George Hunt, two-year-old Lancashire twins, sailed recently on a six-thousand-mile trip from Liverpool to Britannia, British Columbia, on board the Canadian Pacific liner "Duchess of Athol." George looks as though quite capable of defending sister June and faces the world with the air of one ready for all hazards. However, Canadian Pacific officials, both on the ship and the railway, smoothed the way for the tots and their trip was one long playtime to the two of them.

U. S. SENATOR SAYS TRADE WITH CANADA IS KILLED

Washington.—Senator George of Georgia, in a statement issued recently through the Democratic National Committee, assailed the administration for "strangling Canadian trade with the greediest tariff bill ever enacted." The tariff, he said, "has squeezed more than a protesting squawk out of our northern neighbor and best customer."

"Unwittingly or not it has made the Smoot-Hawley-Grundy tariff an important issue in the forthcoming general election in Canada, to which country, in 1929, we exported \$948,000,000 worth of commodities, and from which we imported the same year shipments to the sum of \$502,000,000—a trade balance of \$445,000,000 in our favor."

"Obviously the loss or the serious curtailment of our trade with the Dominion of Canada is no trifling incident. On the contrary, it presents proportions which, in time, may assume aspects that will have to be treated as an economic calamity."

"Figures compiled in the department of commerce confirm the fact that when the president approved the Smoot-Hawley-Grundy tariff act he killed the proverbial goose that lays the golden eggs with one stroke of his pen."

"It is to be regretted that efforts to promote friendly relations with our neighbors are not supported by liberal trade policies."

Investigate Butter Prices

Charge Made That Combines Exist Among Certain Produce Companies

Ottawa, Ont.—Charges that a combine exists amongst certain produce companies with a view to depressing the price of butter to the producers may be ventilated under the Combines Investigation Act, at least in one section of Canada, if the representations of Jean Francois Pouliot, former Liberal member of Parliament for Temiskaming, Que., are prosecuted to their ultimate stages.

In a communication to Hon. Peter Heenan, Minister of Labor, was enclosed a copy of a newspaper circulating in his constituency wherein is the assertion is made that the wholesale dealers "keep the market prices low when they purchase butter and accumulate it in cold storage for some time, selling it at an exorbitant price to the consumer later."

They thus deprive the farmer of his legitimate profits, says Mr. Pouliot.

The former member asked the minister to intervene under the Combines Investigation Act.

Disastrous Forest Fires

Loss In Northern Saskatchewan During Three Months \$138,929

Prince Albert, Sask.—Forest wealth of more than \$138,929 went up in smoke in the fire ravages in Northern Saskatchewan from April 1 to June 30, Dominion forestry office revealed. This figure covers only 17 1/2 of the 225 fires reported in this period, but it includes the major conflagrations.

Including the disastrous fire at Birch Bark Lake, 171,627 acres were burned over by the fires; 17,723,000 board feet salvable saw timber burned, and 3,033,000 board feet destroyed. Sixty-five thousand of the 108,338 cords of fuel and pulpwood in fire areas are salvable. Causes of the fires are summarized as follows: Settlers, 91; campers and travellers, 43; incendiary, 34; railways, 14; smokers, 6; unknown, 5; lightning, 1, and lumbering 1.

Marksmen At 78

Bisley Camp, England.—Sergeant Mackay, of Scotland, is 78 years of age. He won the King's prize, classic for Empire marksmen—though it was called the Queen's prize then—back in 1893. But if anybody thinks he is losing his keen eye and steady hand he has only to point to the score card he hung up at the Bisley meet recently—six consecutive bull's eyes at 200 yards.

Rt. Hon. William Lyon
Mackenzie King, P.C.

Sporting Notes

At the baseball game Thurs. between Stony Intermediates and Rosenthal, at Edmonton Beach, the score was 14-14 at the end of the 9th. Stony's battery: F. Goddard p, Chas. Wudel c.

The Rosenthal team played a return match on the Stony grounds on Friday, 11th., and gave Stony a good chase to win. The score being tied at

HENRY'S BUSY DAY.

the end of the 8th. Final score: Stony 15 runs; Rosenthal 8. Batteries: Rosenthal J. Hoffmann p; G. Shanl c. Stony: E. Enders p. C. Wudel c. Mr. H. Sinner umpired.

Mr. Jack McIsaacs has sold his racing auto "bug" and is now concentrating his energies on the new aquatic wonder — the water scooter. When completed, this marvel will be given a preliminary canter on the lake at Edmonton Beach. Reserved seats on sale now. The inventor will be pleased to near from boatmen who will volunteer to keep the race course clear on the day of the trial.

United Church Notes.

Our church is about to proceed with a re-building project. There is to be a vestibule and tower, and a cement foundation. The building is to be moved back and placed in line with the town hall. The interior is to be re-decorated.

Services are proceeding as usual despite the holiday season and hot weather.

RAIL AND STEAMSHIP LINES

Stony Plain and District.

Mr. A. Patterson is spending his vacation at Banff.

Mr. John Clements headed a motor party which left on Monday for Vancouver; afterwards making a tour of the Coast States. He expects to be away a month.

Mrs. Katherine Kildow and Mrs. Christina Green, Denver Colorado, are visiting Mr. and Mrs. A. Wolfe.

Mr. Carl and Denzel and Miss Abbe Boone motored up from Indianapolis, Ind. and are visiting with Mr. and Mrs. Geo. Liebert.

Mr. Ralph Witherspoon, who had been visiting with his parents here for several weeks, returned on Tuesday to his teaching duties at Fairview (Waterhole).

Mr. and Mrs. S. Wainberg of Bashaw, and Mr. and Mrs. O. Oppertshausen of Rochefort, were Sunday visitors in town. Les Robbins of Wahsatana was a caller at the Sun office on Monday; and Donald MacLeod, M. L. A., paid Stony a visit on Tuesday.

Mr. Louie Ulmer is expected home this week from an Edmonton hospital, where he had been receiving treatment for an injured hand, and has undergone two minor operations.

A meeting of the Stony Plain Agriculture Society will be held in the Town Hall on Tuesday Aug. 12th.

Mr. Peters has just had his grain elevator painted in the new and fashionable shades.

Stony Plain Motors got in another shipment of the New Fords.

Rev. Ph. Unterschuetz this week acquired a Pontiac coach from Agent Pidgeon.

There has been quite an exodus, this week, of farmers of the district to Edmonton Exhibition.

Off with the old Black Rime; on with the new Whiteoat Yellow Gold. Do you know that the black frames are out of date, and that white is the proper thing in spectacle wear? Be up to date and see M. Mecklenburg, the well-known Edmonton Optician, at the Royal Hotel, Stony Plain, on Thursday, August 7th. 10170 101st St., Edmonton. Phones 1072 & 2946.

Edmonton Beach.

Another record crowd was present at this popular Beach on Sunday last.

The William McLeod and Henry Kohl families, of Spruce Grove, moved out to their cottages this week.

The P. & B. Troop, Boy Scouts, from Stony Plain, are encamped here this week.

The prizes won on Dominion Day were awarded the winners on the 13th. A very interesting ball game was played on Sunday, between a C.N.R. team and players from Callahoe. The game was fairly close the first few innings, but the Railway boys began to shade the Braves, and wound up with a score of 12 to 6.

Bright Bank Briefs

Many acres of new land are being broken in this district.

The roads were rather muddy after the recent rains.

When coming home from the Beach the other day some cars preferred the ditch.

All the local politicians are making their usual predictions on the forthcoming election on the 28th.

Spruce Grove News

Mr. Wm. Maier of Bon Accord motored out to the Grove Thursday. He was accompanied by Mrs. Maier, and Mrs. McLeod of Edmonton.

Several local residents are appearing in an Edmonton court this week, on charges laid under the Highway Traffic act.

Two motor cycle policemen will shortly be operating on the Baseline, from Edmonton west.

Hon. Charles Stewart and others will address a meeting at Spruce Grove this Thursday evening (July 17) at 8 p.m.; and at Golden Spike the same evening at 9 p.m.

Mr. Ducholki and Mr. J. Brox headed a large delegation of Conservatives on Friday last, who went to Stony to hear Messrs. Stevens and Maitland speak.

The Grove's young athletes made a good showing at the Winterburn games last week.

Another championship game of horseshoe was played at the Grove Friday evening between the Grove (D. Brox & Connolly) and C. N. R. (Warner Storm & J. Cameron). The result: 1st game, Grove 20, C.N. 19; 2d game, Grove 21, C.N. 10. Grove team wins by a score of 12.

The local horseshoe pitchers sent a team in, to compete in the contests at Edmonton Ex.

The Grove's tennis players made another successful trip, last week, to the courts at Stony Plain. More trophies!

Here and There

Prince Iyegao Tokugawa, president of the Japanese House of Peers, and his son, Hisa Iyegao Tokugawa, Japanese Minister to Canada, are recently on board Canadian Pacific liner Empress of Japan. The Prince was on his way to London to attend the Imperial Conference and took the opportunity to see his son who had come to Victoria from Ottawa to meet him.

Leaping into shark-infested waters in the China Sea halfway between Hong Kong and Shanghai, Carpenter Tom Ellworthy, of the S.S. Empress of Russia, saved the life of Mrs. Makareff, passenger on the ship who had jumped overboard in a fit of dementia. The woman strongly resisted efforts to rescue her and 4th Engineer Dean went to Ellworthy's assistance, the two men succeeding in bringing her back aboard ship after long and exhausting struggles.

Beating the world's record in passenger traffic operation, Western Canada comes into the limelight this year with the 1352 mile continuous run from Port William to Calgary of the Canadian Pacific locomotive number 2808. A number of locomotives of this class are now being built by the railway, equipped with roller-bearing boxes which will still further facilitate such operations on long runs.

The season's first climb of Mt. Temple, 14,000 feet and the line, Rockies, was made last week by Dr. Thorington of Philadelphia, well-known writer and alpinist, and W. Kerr, of Vancouver. Edward Ross, dozen of Swiss guides in the Rockies, was in charge of the climb which started out from Chateau Lake Louise at three in the morning and reached the summit at ten.

With the opening of the new Pines Hotel at Pelly and of the Algonquin Hotel at St. Andrews-by-the-Sea at the end of June, the tourist season in the Maritime Provinces is now in full swing. Reservations at both hotels are very heavy, forecasting a prosperous season.

Difficulties met by Canadian and United States motorists when taking their cars to Europe have been overcome by facilities afforded by the Canadian Pacific Railway, under which the owner can ship his car as baggage between Canada and Europe, points in either direction. The Company arranges for the necessary permits and registration documents for every country to be visited, driver's license, license plates, and membership in the Royal Automobile Club. The car is unloaded within an hour of the ship's arrival and is furnished with oil and a small supply of gasoline and is ready for the road. There is no red-tape and no bond or other financial guarantee required.

Believed to be the largest salmon ever taken by fly on the Medway River, Cape Breton, Archie Jondry, Baugouette Club guide, took a fish recently that weighed 32 lbs., was 48 inches long and with a girth of 21 inches. The fish has been photographed for reproduction in the Saturday Evening Post.

The railway grade crossing problem is not a problem of the railway, making but essentially a social problem and responsibility for its solution rests upon society as a whole. In the opinion of W. F. Dorrance, Chief of the Bureau of Safety, United States Interstate Commerce Commission.

Saturday's Liberal Meeting.

All available seating accommodation was taken when the meeting in the Moose Hall opened on Saturday evening. Dr. Walton was in the chair, and with him on the platform were Hon. Chas. Stewart, W. J. A. Mustard, Robert McLaughlin and Geo. J. Bryan. The latter gentleman was the first one up, and devoted most of his address to the misstatements made the previous afternoon by the Hon. H. H. Stevens, and scored a hit.

Mr. McLaughlin gave an informative address on things in general, but decided not to touch on those subjects which would be dealt with later on in the evening by Mr. Stewart.

By this time the heat in the hall was quite oppressive; and, before beginning his address, Mr. Stewart asked, and was granted, permission to remove his coat. Well, and from then on, the auditors were given a straight-from-the-shoulder address, which touched on practically everything which had come up in his Department, and before the Federal Cabinet, during the last four years. He mentioned the Australian treaty, and stated the Cabinet had given notice annulling the treaty, to take effect Oct. 1. He explained the part he had taken in helping prepare the Dunning budget, and told how the countervailing duties would work. He championed the Preferential treaty with Great Britain, whereby our exchange of commodities with that country would be increased; a number of other matters were taken up by the speaker; the meeting coming to a close about midnight.

Auto Accident at Grove

While Mr. W. Hoople was driving home from Edmonton on Monday in his new sporting roadster, his automobile seemed to get out of his control just as he was passing the Lutheran church at Spruce Grove. The car careened over to the south side of the trail, travelled a short distance in the ditch, and came to a halt against a post of the railway enclosure. Several nearby men who had witnessed the accident rushed to the scene, where it was found the car had turned over on its side, injuring Mr. Hoople who had been caught in the left side door. The injured gent was removed to the Spruce Grove Hotel, where his injuries were attended to by Dr. Walton of Stony Plain. The car was taken to Dave Bell's auto hospital. Mr. Hoople owns several sawmills on the C. N. line west of Stony, and had been to Edmonton selling several carloads of lumber.

U.F.A. Local Proceedings

Stony Plain local U. F. A. held its regular meeting on the 10th, with Pres. Pöpp in the chair. About a score of members were present. After roll call a discussion opened on the question of the binder twine supply for this season.

A communication was read from the Co-operative Association offering to supply 550 and 600 ft. lengths at a certain price f. o. b. Edmonton.

One member suggested the advisability of combining their needs with that of some nearby U. F. local, with the object of ordering a carload lot of 24,000 pounds. A survey of the requirements of the members present showed the need of approximately 4 tons, with a number of the big farmer members absentees.

A suggestion was made that it would be advisable to consult the twine dealers in Stony and compare prices.

A motion carried that a special meeting be called for Thurs. July 24th, to consider the whole question, decide on action to be taken, and proceed with the orders.

In view of the fact that an assessment on each of the members of the Local is to be made, to help defray the expenses of the recent election, a rider was added to the motion re the special meeting that any new business which may come up, that this be dealt with.

The proposition to hold the annual picnic was received enthusiastically, and a committee appointed to fix the date and make the necessary arrangements.

After several minor matters were dealt with, the meeting adjourned.

A Price Forecast

The department of agriculture at Washington has issued a statement predicting that wheat prices will range lower during the next seven years than they have during the last seven. The forecast is issued in order that it may be made the basis for a campaign, by farm leaders and government officials, to persuade the farmers of the United States to grow less wheat. Instead, the farmers are to be told they should turn attention to varied production.

Calendar.

JULY—
24—Stony's U. F. Local meets.
27—Waltham League Rally at Edmonton Beach.
28—Election Day.
AUGUST—
1—Inga Councillors meet
3—German celebration in Edmonton
6—The W. I. T. Garden Club competition.
6—Stony's Civic Holiday.
7—Meeklenburg at the Royal Hotel.

Mike Says :

Speaking of silence in factories, what this country needs is a window screen that will filter out auto hooters at one a. m.

One of these days some political leader will address a meeting without complimenting the ladies on their good looks and the men on their intelligence. And then will come the landslide!

Railway Time Table

Going East—Every day except Tuesday at 7.01; every morning at 6.23.
Going West—Every day except Sun., at 22.28; every midnight at 24.04.

Holidays on Horseback in West

Year by year the idea of Dude Ranching as a holiday recreation that really means recreation, is taking greater hold on young and old alike all over the continent. Horseback riding, trail riding, taking part in rodeos—if you are a good enough cowboy—but anyhow on horseback from morning to night, that is the way to harden the muscles and bodies of people who have gone soft in the enervating life of cities. This totally different kind of a holiday is offered in any of half a dozen Dude Ranches in the Alberta Foothills and the Rockies. There is the historic Kananaskis Ranch, owned by Mrs. "Bill" Brewster; the T. S. Ranch, operated by Guy Woodick; the Lake Windermere Girls Camp and the E. Y. Ranch, recently opened by Miss Emily Yates of Montreal, to name a few. The holiday-maker attires him or herself in weird and wonderful cowboy outfit from high-heeled boots and chaps to ten-gallon hat and tries out everything—roping and tying calves, packing mules and ponies and learning all the mystery of the ancient craft of knot-tying, riding the mountain trails and sleeping out of nights—just a real western open-air holiday. Lay-out shows typical scenes from the Kananaskis Ranch.—Society buds host-ying a calf; a party of riders all set for a day's outing and a glimpse of the exciting business of erecting a teepee.
